STATEMENT OF WORK (SOW)
For the Firefinder Radar Screening Program
NSN 5840-01-450-6708

1.0 SCOPE: This Statement of Work (SOW) establishes, sets forth tasks and identifies the work effort that the Contractor will perform to screen and repair Firefinder Radar Equipment (Circuit Cards). These documents contain requirements to restore the Firefinder Radar Circuit Cards to Condition Code "A". Condition Code "A" is defined as "serviceable/issuable without qualification, new, used, repaired or reconditioned material which is serviceable and issuable to all customers without limitation or restriction, including material with more than 6 months shelf-life remaining." Within this SOW, the term Line Replaceable Unit refers to the Firefinder Radar Circuit Cards listed in Appendix (D), which the Firefinder Radar Inventory Manager, at Marine Corps Logistics Bases (MCLB) Albany, Georgia, will periodically update. Screening or repairing of Circuit Cards not listed in Appendix (D), will only be performed when expressly authorized, in writing, by the Firefinder Radar Inventory Manager. When screened or repaired, the Contractor will assign the appropriate condition code to the Circuit Cards.

1.1 Background: Repair is defined as "That maintenance technique which determines the minimum repairs necessary to restore equipment, components, or assemblies to prescribed maintenance serviceability standards by utilizing all available diagnostic equipment and test procedures in order to minimize disassembly and parts replacement."

2.0 APPLICABLE DOCUMENTS: The following documents form a part of this SOW to the extent specified. Unless otherwise specified, the issues of these documents are those listed in the Department of Defense Index of Specifications and Standards (DoDISS) and supplement thereto which is in effect on the date of solicitation. In the event of conflict between the documents referred herein and the contents of this SOW, the contents of this SOW shall be the superseding requirement.

2.1 Military Standards

MIL-STD-2073-1C	DoD Standard Practice for Military Packaging
MIL-STD-129	DoD Standard Practice for Military Marking
MIL-STD-130	Identification Marking of U.S. Military Property

Military Standards (For Reference Only)

MIL-STD-973	Configuration Management
-------------	--------------------------

2.2 Industry Standards

ANSI/EIA-625	Requirements for Handling-Electrostatic-Discharge-
ANSI/ISO/ASQC Q9003-1994	Quality Systems-Model for Quality Assurance in
	Final Inspection and Test

2.3 Other Government Documents and Publications: The issue of those documents cited below shall be used.

DMWR 11-5840-354

DMWR AN/TPQ46A

Copies of Military Standards and Specifications are available from the DOD Single Stock Point, Defense Automation Production Service Philadelphia, Building 4D, 700 Robbins Avenue, Philadelphia, PA19111-5094, Telephone (215) 697-2179 or DSN 442-2179, or <http://www.dodssp.daps.mil/>. Copies of other government documents and publications required by contractors in connection with specific SOW requirements shall be obtained through the Weapons System Manager (WSM): Commander, Marine Corps Logistics Bases, (Code 833-1) Attn: Contracting Officer, 814 Radford Blvd., Albany, Georgia 31704-1128, commercial telephone number (912) 439-5432 or DSN 567-5432. Copies of engineering drawings, if applicable, shall be obtained from Commander (Code 825), Marine Corps Logistics Bases, 814 Radford Blvd., Albany, Georgia 31704-1128, commercial telephone number (912) 439-6423 or DSN 567-6423.

3.0 REQUIREMENTS

3.1 General Tasks: In fulfilling the specified requirements, the Contractor shall:

- a. Provide materials, labor, equipment, facilities and missing/repair parts necessary to inspect, diagnose, restore, test, and calibrate the Firefinder Radar Circuit Cards. Upon completion of screening, the subject Circuit Cards shall be Condition Code "A".
- b. Requisition replacement parts from the applicable source of supply.
- c. Ensure the Circuit Cards are modified to current configuration. If a modification has not been applied, indicate on the Limited Technical Inspection at time of induction, as prescribed in paragraph 3.2.1.

3.2 Detail Tasks. The following tasks describe the different phases for screening/repair of the Firefinder Radar Circuit Cards.

Phase I	Pre-Induction
Phase II	Repair
Phase III	Inspection, Testing and Acceptance
Phase IV	Packaging, Handling, Storage and Transportation (PHS&T)

3.2.1 Phase I - Pre-Induction. A pre-induction inspection analysis shall be performed for each Circuit Card within 5 working days of induction into the Contractor's facility for evaluation of repair capability. If repair is not feasible, assign CC "F", otherwise assign CC "M" and induct into repair cycle. Standard Form 364 (Appendix B) and Report DA-2404 (Appendix A) shall be used to report all anomalies and shall be provided to the government in accordance with section 4.0 of this SOW.

3.2.2 Phase II – Repair: After pre-induction tests and inspections have been completed, repair of the Circuit Cards shall be accomplished in accordance with this SOW. Deficiencies

noted on Appendix A and Appendix B during Phase I shall be repaired/replaced. Components or assemblies shall not be disassembled for replacement of parts unless that part has failed, or the component assembly wherein the part is located is disassembled for repair.

a. **Hardware**

(1) Replace broken, unserviceable and/or missing hardware including nuts, bolts, screws, washers, turnlock fasteners, mandatory replacement items, safety, and one-time use items.

(2) Ensure proper hardware locking devices are present on all moving mechanical assemblies.

(3) Hardware normally supplied with commercial parts shall be used unless specifically prohibited.

b. **Publications and Documentation:** The Contractor shall use appropriate technical documentation to restore the Circuit Cards to the condition code "A" as discussed in paragraph 1.1.

c. The following Standards shall be used to assist the Contractor:

MIL-STD-130

Identification Marking of U.S. Military Property

DMWR 11-5840-354

DMWR AN/TPQ46A

d. Repair time shall not exceed ninety days as a norm. The Firefinder Radar Inventory Manager shall monitor and direct retention or return to stock if it is anticipated that the repair time will exceed ninety days.

3.2.3 Phase III - Inspection, Testing and Acceptance

a. Inspection, Testing, and Acceptance of each Firefinder Radar Circuit Cards shall be conducted in accordance with DMWR 11-5840-354-DMWR AN/TPQ46A.

b. The Contractor shall be responsible for conducting all required tests on the Circuit Cards.

c. The Contractor shall be responsible for correcting deficiencies identified during inspection/ testing. MCLB (Code 833-1), Albany, Georgia, representatives may require the Contractor to repeat tests or portions thereof, if the original tests fail to demonstrate compliance with this SOW.

3.2.4 Phase IV - Packaging, Handling, Storage, and Transportation (PHS&T)

a. The Contractor shall be responsible for preservation and packaging of items being repaired under the terms of this statement of work. Items being prepared for long term storage or shipment to overseas destinations shall be in accordance with level "A" requirements of MIL-STD-2073-1C, Appendix J, Table J.Ia., Specialized Preservation Code "GX" for those items of

Federal Supply Class (FSC) 5998 and 5999. Those items of FSC 5840 and 5895 shall be level "A" in accordance with MIL-STD-2073-1C, Appendix A, Table A.VI., Electronic Equipment. All items packaged under "GX" shall be placed in a reusable fast pack container. Items being prepared for domestic shipment, immediate use or short-term storage shall be to level B requirements.

b. Marking shall be in accordance with MIL-STD-129.

c. The Marine Corps will provide the Contractor with the shipping address(es) for delivery of the repaired equipment. The Contractor shall be responsible for arranging for shipment of the equipment to the pre-designated site(s). The Marine Corps will be responsible for transportation costs associated with shipping the subject equipment to and from the Contractor.

3.3 Configuration Management: The contractor shall apply configuration control procedures to established configuration items. The contractor shall not implement configuration changes to an item's documented performance or design characteristics without receiving prior written authorization. The baseline configuration has been defined by the written procedures or materials contained in manuals, standards, instructions or engineering drawings. If it is necessary to depart from the authorized configuration baseline, the contractor shall submit a Request for Deviation or Request for Waiver using MIL-STD-973, paragraph 5.4.3 or 5.4.4., as a guide.

3.4 Government Furnished Equipment (GFE)/Government Furnished Materiel(GFM). GFE is government owned equipment authorized by contract for use by commercial/Government contractor. It is neither consumed during production nor incorporated into any product. GFM is materiel furnished to a contractor that will be consumed during the course of production or incorporated into the product being manufactured/remanufactured under a contract/statement of work. In the event the Marine Corps does have GFE/GFM requirements the Management Control Activity (MCA/827-2), Marine Corps Logistics Bases, Albany, Georgia, will coordinate required GFE and will maintain a central control on Marine Corps assets in the Contractor's possession. The MCA will forward a GRE Accountability agreement to the Contractor Facility for signature to establish a chain of custody and property responsibilities for Marine Corps assets.

3.5 Electrostatic Discharge (ESD) Control Program: The Contractor shall establish, implement and document an ESD control program following the guidelines provided in ANSI/EIA-625. ESD protective measures shall be used during manufacturing, handling, inspection, test, marking, packaging, storing and transporting ESD sensitive components.

3.6 Quality Assurance Provisions: The Contractor shall provide and maintain a Quality System that has a minimum, adheres to the requirements of ANSI/ISO/ASQC Q9003-1994, Quality System Model for Quality Assurance in Final Inspection and Test. The program shall ensure quality throughout all areas to include fabrication, processing, assembly, inspection, test, maintenance, and preparation for delivery and shipping. Unless otherwise specified in the contract, the Contractor shall be responsible for performance of all inspection requirements. The Government reserves the right to perform any of the inspections set forth in the contract where

such inspections are deemed necessary to assure products and services conform to the prescribed requirements.

3.7 Acceptance: The performance of the Contractor and the quality of work delivered, including all equipment furnished and documentation written or compiled, shall be subject to in-process review and inspection during performance. Inspection may be accomplished in-plant or at any work site or location, and QA representatives shall be permitted to observe the work or to conduct inspections at all reasonable hours. Final inspection and acceptance testing shall be conducted at the Contractor's facility. Final acceptance shall be conducted on 100% of items to verify that the units meet all requirements.

3.8 Rejection: Failure to comply with any of the specified requirements listed herein shall be reason for rejection by the QA representative. The Contractor shall, at no additional cost provide the following:

- a. Develop a corrective action plan to correct deficiencies.
- b. Upon approval of a corrective action plan, the Contractor shall correct the deficiencies and repeat the verification until all requirements are met.

4.0 REPORTS

4.1 In fulfilling the specified requirements, the Contractor is required to submit:

- a. A Monthly Status Report shall be submitted to the inventory manager by the 10th of each month. The report should include reviewed ECPs, significant events, site visit maintenance actions, and funding data. Additionally, points of contact information for Firefinder Radar Circuit Cards shall be submitted with the Monthly Status Report.

- b. A Monthly Firefinder Radar Screening Program Report, Appendix (C), which shall include all data from the previous months for the current fiscal year. The report should include all completed and In-process items in NSN sequence. This report shall be submitted no later than the tenth of the following month.

- c. The reports shall be submitted via E-Mail to the Firefinder Radar Inventory Manager (IM), with courtesy copies to the Weapon System Manager (WSM) and Equipment Specialist (ES).

E-mail addresses:

drakejd@matcom.usmc.mil	John Drake - Item manager
reynoldsfr@matcom.usmc.mil	Fred Reynolds - Weapon System Manager
wesleyja@matcom.usmc.mil	John Wesley - Equipment Specialist
townsendda@matcom.usmc.mil	SSgt David Townsend – Equipment Specialist

- d. Prior to the submission of the final report (15 October), the Contractor shall close out the Screening Program Master Work Schedule Line item number that provides program funding. Non-closure shall not be cause for delay of the final report.

e. Provide a five year estimate of the funding required to support the repair of Firefinder Radar Circuit Cards. The report shall be due to the Inventory Manager by 31 March of each year for funding planning purposes for the coming fiscal year.

5.0 COST AND FINANCIAL ADMINISTRATION

a. Upon completion of negotiations, the agreed upon price shall remain fixed for the duration of the repair effort, or through the end of the fiscal year, whichever comes first. The price for any work to be performed for the next fiscal year shall be developed by the repair facility, and shall be submitted to MCLB Albany, by 15 August to allow for processing of agreed upon documentation, prior to the beginning of the fiscal year.

b. The specific procedures, which shall be used to transfer funds under this SOW, shall be determined by financial management representatives of the two activities. On a quarterly basis, the Military Interdepartmental Purchase Request (MIPR) shall be used for transfer of funds between the parties to this SOW. The Contractor shall submit final obligation by one (1) week prior to the end of the fiscal year. This agreement shall go into effect when funds are transferred to the Contractor.

c. The Program Pricing Policy for repair costs shall be determined as follows:

1. Labor cost shall be calculated and recorded against each item processed based on agreed labor hour rates.

2. Parts costs shall be stratified over the dollar value (Standard Unit Price) of each item processed to include "lot-quantity" materials.

3. The pricing policy shall allow for determination of fund balances based on Monthly Firefinder Radar Screening Program Reports and must equal the total funded for a fiscal year upon completion of the last in process items for that fiscal year.

4. MCLB Albany shall annually review and establish general program pricing policy as necessary.

d. The Contractor shall maintain complete fund accounting, according to current regulations and the procedures identified in this SOW.

e. The Contractor and MCLB Albany shall conduct a financial review no later than 1 July to determine the funding required for the remainder of the fiscal year. MCLB Albany shall take the lead in scheduling the date and time for the financial review.
